

BIKEDIN, IN GOOD COMPANY

A platform for companies to promote the use of sustainable means of transport.

BikedIn is a project in support of the environment and green mobility, designed for all companies that want to promote the use of sustainable means of transport to go to work in total safety, giving the possibility to those who use a bicycle to leave it in a safe and secure place.

The idea was born from the analysis of a real need, that is, to be able to use a bicycle to go to companies for business meetings, knowing that you can leave your bike in a special place, safe from theft or damage.

Comfort, commitment, health, security and image: these are the reasons behind BikedIn.

Sign up your company: be in good company!
